

Online Teaching & Learning @ F.Y.B. Tech AY 2021-22: Student's Reflection

It is now almost the end of our first semester. We CR, and all BRs on the behalf of I Div. would like to thank all our Teachers and supporting staff for making it a fruitful and enjoyable semester. Yes, it was tough for both teachers as well as students. No one ever imagined it. An Online Semester just of 90 Days consisting of holidays as well. Really it is appreciable how our all teachers managed upon and found out different ways the students could understand.

This was our first step in the Engineering field, and we proudly say that we received the best guidance from the best teachers.

We would like to thank our Class teacher for being a great helping hand and guiding students.

Special Thanks to our HoD for managing all the activities and solving all the problems of students immediately.

Offline would have been fun but making the same thing possible in online mode was a great challenge and our teachers did it. We would again thank all teachers, students, and managing staff.

Lastly, we would like to request you all to take care of your health and of your Family amid this Pandemic situation and hope that we would meet soon when the situation is again in control.

Thank You.

Yours Truly

" I " Div.
